The Secret Behind Greener Lawns

El secreto detrás de los céspedes más verdes

The Revive Secret

Revive is a soil treatment made from a combination of soil wetting agents, lignosulfonates and iron. Revive allows water to penetrate deeper into hard-to-wet soils, even through thatch and mat. Revive helps save water and solves problems associated with hard, dry, compact soils and the additional iron helps thicken and turn your lawn dark green.

WaterWise System
Revive improves water penetration into soil making more water available to plant roots even in times of restricted water use and drought so you can go longer between waterings, enhance your lawn's appearance and reduce total water consumption.

Green Lawn Formula
The ingredients in Revive's formula are fortified with iron to produce greener, thicker lawns.

Kid & Pet Friendly
Safe formula treats your lawn without requiring your family and pets to stay off the lawn for hours!

Ugly Lawn Eliminator
Turn lawns dark green and help maintain thickness. Stop the dry brown spots in your lawn.

WARRANTY STATEMENT

Revive, Inc. is not responsible for the use or misuse of the product. Results can vary due to soil types, weather and other variables. Liability is limited to replacement of an equivalent amount of Revive.

DECLARACIÓN DE GARANTÍA
REVIVE, INC. NO SE HACE RESPONSABLE POR EL USO O MAL USO DEL PRODUCTO. LOS RESULTADOS PUEDEN VARIAR SEGÚN EL TIPO DE SUELO, EL CLIMA Y OTRAS VARIABLES. LA RESPONSABILIDAD LEGAL SE LIMITA AL REEMPLAZO DE UNA CANTIDAD EQUIVALENTE DE REVIVE.

CAUTION

KEEP OUT OF THE REACH OF CHILDREN. MAY DISCOLOR WOOD AND CONCRETE. DO NOT ALLOW PRODUCT TO FREEZE. AVOID CONTACT WITH EYES.

NOTICE

NOT FOR USE IN ORGANIC CROP AND FOOD PRODUCTION IN ALL STATES, INCLUDING CALIFORNIA

AVISO

ESTE PRODUCTO NO DEBE UTILIZARSE EN CULTIVOS ORGÁNICOS Y PRODUCCIÓN DE ALIMENTOS EN NINGÚN ESTADO, INCLUYENDO CALIFORNIA

What Revive Does

- Conserves water during times of drought, severe heat and watering restrictions by wetting the soil deeper allowing your lawn to store more water between irrigations.
- Makes better use of water as it penetrates deeper into the soil, runs off less on slopes, and reduces evaporation.
- Moves fertilizer deeper into the roots, while providing supplemental iron.
- Assists in breaking up and loosening compacted soil by promoting root activity.
- Helps eliminate dry brown spots and turn lawns green.

Directions For Use

Lawns: Apply Revive any time during the growing season. Revive is especially beneficial if applied before, during or after applying fertilizer. Spot treat brown areas, areas where puddles form, slopes where run-off occurs and around landscape plants. Then spray the entire lawn area. **For best results, thoroughly water after application.** Revive can easily be applied with a sprinkling can, hose end spraying device or pressure sprayer. Application can begin as soon as the ground has thawed or any time during the growing season. You can apply Revive after sodding or seeding. Reapply as needed.

Céspedes: Aplique Revive en cualquier momento de la época de crecimiento. Revive es especialmente beneficioso si se aplica antes, durante o después del fertilizante. Trate las zonas marrones, zonas en las que se forman charcos, pendientes en las que hay escurrimiento y alrededor de las plantas ornamentales. Después, rocíe todo el césped. **Para obtener mejores resultados, riegue completamente después de la aplicación.** Puede aplicar Revive fácilmente con una regadera, un rociador de manguera o un rociador a presión. La aplicación puede comenzar tan pronto como la escarcha del terreno se derrite o en cualquier momento durante la época de crecimiento. Puede aplicar Revive después de la siembra y la cobertura con césped. Vuelva a aplicar cuando sea necesario.

Recommended Reapplication Frequency:	**Spring**	**Summer**	**Fall**
Spot Treatment problem areas only:	6 wks	4 wks	6 wks
Broadcast spray entire lawn:	6-8 wks	4-6 wks	6-8 wks

For lawns grown on heavy clay, caliche, or alkaline soil or lawns that are heavily thatched and matted, 2-3 applications are recommended at 10-day intervals when beginning treatment.

Landscape & Flower Beds: Treat entire area(s) before planting or before plants flower. **For best results, thoroughly water after application.** Do not apply directly on flower petals or ferns. Revive can easily be applied with a sprinkling can, hose end spraying device or pressure sprayer. Application can begin as soon as the ground has thawed or any time during the growing season. Reapply as needed.

Paisajismo y canteros: Trate toda la zona antes de la plantación o antes de la floración. **Para obtener mejores resultados, riegue completamente después de la aplicación.** No aplique directamente sobre los pétalos de las flores o sobre helechos. Puede aplicar Revive fácilmente con una regadera, un rociador de manguera o un rociador a presión. La aplicación puede comenzar tan pronto como la escarcha del terreno se derrite o en cualquier momento durante la época de crecimiento. Vuelva a aplicar cuando sea necesario.

Guaranteed Analysis

Iron (Fe)..... 1.00%
1% complexed iron

Derived from Ferrous Sulfate

ALSO CONTAINS NON-PLANT FOOD INGREDIENT(S):
10.92% ..... Alkyl Phenol Ethoxylate
4.28% ..... Lignosulfonate

Information regarding the contents and levels of metals in this product is available on the internet at http://www.aapfco.org/metals.htm

Application Rates
One gallon covers 4000 sq ft.

Sprinkling Can (Spot Treatment)…
8 oz. to 1 GAL water
Hose End Sprayer…
Use in undiluted form
Set dial to 8 oz.
Pressure Sprayer…
1 GAL to 20 GAL water

PRECAUCIÓN
MANTENGA FUERA DEL ALCANCE DE LOS NIÑOS. PUEDE DECOLORAR LA MADERA Y EL CONCRETO. NO PERMITA QUE EL PRODUCTO SE CONGELE. EVITE EL CONTACTO CON LOS OJOS.
