Organic-Based Water Saving Soil Treatment With Supplemental Nutrition

The Revive Secret

Revive is an organic-based soil treatment made from a combination of soil wetting agents, lignosulfonates and iron. Revive allows water to penetrate deeper into hard-to-wet soils, even through thatch and mat. Revive helps save water and solves problems associated with hard, dry, compact soils and the additional iron helps thicken and turn your lawn dark green.

Granular Revive is made with DPW (Dehydrated Poultry Waste) containing primary plant foods that have a low burn potential. The result is a non-burning organic-based fertilizer that saves water.

Directions For Use

Lawn and Turf Areas: Apply Revive any time during the growing season. Revive is especially beneficial if applied before, during or after applying fertilizer. Treat brown areas, where puddles form, slopes where run-off occurs, and around landscape plants. Cover entire lawn area. **For best results, thoroughly water after application.** You can apply Revive after sodding or seeding a new lawn or with a soil test.

Recommended Re-application Frequency:

Treatment - problem areas only:	Spring	Summer	Fall
Broadcast - cover entire lawn:	6 wks	4 wks	6 wks
	6-8 wks	4-6 wks	6-8 wks

For lawns grown on heavy clay, caliche, or alkaline soil or lawns that are heavily thatched and matted, 2-3 applications are recommended at 10-day intervals when beginning treatment.

Landscaping & Flower Beds: Treat entire area(s) before planting or before plants flower. **For best results, water thoroughly after application.** Re-apply as needed. Revive can be easily applied with a drop or broadcast spreader.

NOTICE
NOT FOR USE IN ORGANIC CROP AND ORGANIC FOOD PRODUCTION

CAUTION
 KEEP OUT OF THE REACH OF CHILDREN, MAY STAIN WOOD AND CONCRETE.
WARRANTY STATEMENT
 Revive, Inc. is not responsible for the use or misuse of the product. Results can vary due to soil types, weather and other variables. Liability is limited to replacement of an equivalent amount of Revive Granules.

Application Rates
 5 lbs. covers 1000 sq. ft.
 25 lbs. covers 5000 sq. ft.

Spreader Settings
 Age and condition of the spreader can cause wide variation. Settings are approximate due to walking speed and over-lap. Moderate over-application of REVIVE will not burn or hurt your lawn. If you don't see your listing, visit www.Revive.com for updates to listings.

Frecuencia recomendada de re-aplicación:

Tasamiento únicamente en las zonas problemáticas:	Primavera	Verano	Otoño
Generalizado sobre todo el césped:	6 semanas	4 semanas	6 semanas
	6-8 semanas	4-6 semanas	6-8 semanas

Para césped sobre suelo arcilloso, de caliche o alcalino, o para césped muy seco o maltestado, se recomienda realizar 2 a 3 aplicaciones cada 10 días al comenzar el tratamiento.

Jardín y Macizo: Trate el área entera antes de plantar o antes de la flor de plantas. Riegue en. Vuelva a aplicar como necesario. No se presente directamente en patios de flor herbáceas. Revive puede ser fácilmente aplicado con una pala de empuje o gota. Evite superponerse presentándose. Agua a fondo después de aplicación.

AVISO
 NO PARA USO EN CULTIVOS ORGÁNICOS Y PRODUCCIÓN DE ALIMENTOS ORGÁNICOS

PRECAUCIÓN
 MANTENGA FUERA DEL ALCANCE DE LOS NIÑOS. PUEDE DECOLORAR LA MADERA Y EL CONCRETO.

Tasas de aplicación:
 2.5kg cubre 1000 pies cuadrados
 25 libras cubre 5000 pies cuadrados

Configuración de esparcidores: Edad y condición del difusor pueden causar grandes variaciones. Configuración es aproximada debido a la velocidad de caminar y vuelta. Moderada aplicar más de Revive no quemar o dañar el césped.
